

Meeting #3:

Today at the science fair meeting we talked about **variables**.

We reviewed the terms on Vocabulary pages and in the science fair packet.

1. In my experiment I can only change **one** thing; this is called my **independent variable**. The thing I am going to change and test is:

When I change my independent variable I test it in **3** different ways.

2. The **Dependent variable** is the results I can see and measure. The results need to be recorded in metric measurements. In my experiment my dependent variable is:

3. The **Constant variables** are all the other parts of the experiment that I have to work hard to keep the same. The things in my experiment that are going to stay the same are:
